Annex Reference	AERONAUTICAL INFORMATION SERVICES Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
<p>Chapter 1 Reference</p> <p>Definition</p>	<p style="text-align: center;">INTERNATIONAL STANDARDS AND RECOMMENDED PRACTICES</p> <p style="text-align: center;">CHAPTER 1. GENERAL</p> <p><i>Note 1.— The object of the aeronautical information service (AIS) is to ensure the flow of aeronautical data and aeronautical information necessary for global air traffic management (ATM) system safety, regularity, economy and efficiency in an environmentally sustainable manner. The role and importance of aeronautical data and aeronautical information changed significantly with the implementation of area navigation (RNAV), performance-based navigation (PBN), airborne computer-based navigation systems, performance-based communication (PBC), performance-based surveillance (PBS), data link systems and satellite voice communications (SATVOICE). Corrupt, erroneous, late or missing aeronautical data and aeronautical information can potentially affect the safety of air navigation.</i></p> <p><i>Note 2.— These Standards and Recommended Practices are to be used in conjunction with the Procedures for Air Navigation Services — ICAO Abbreviations and Codes (PANS-ABC, Doc 8400).</i></p> <p><i>Note 3.— These Standards and Recommended Practices are to be used in conjunction with the Procedures for Air Navigation Services — Aeronautical Information Management (PANS-AIM, Doc 10066).</i></p>	<p>Civil Aviation Rules (CAR) Part 1.</p>	<p>No Difference</p>		<p>Civil Aviation Rules, the Civil Aviation Act 1990, and Advisory Circulars are available on the CAANZ web site, http://www.caa.govt.nz. AIPNZ is available on http://www.aip.net.nz.</p>

Annex Reference	AERONAUTICAL INFORMATION SERVICES Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
	<p><i>Note 4.— Guidance material on the organization and operation of the AIS is contained in the Aeronautical Information Services Manual (Doc 8126).</i></p> <p style="text-align: center;">1.1 Definitions</p> <p>When the following terms are used in the Standards and Recommended Practices for the AIS, they have the following meanings:</p> <p>Aerodrome. A defined area on land or water (including any buildings, installations and equipment) intended to be used either wholly or in part for the arrival, departure and surface movement of aircraft.</p>				
Chapter 1 Reference	<p>Aerodrome mapping data (AMD). Data collected for the purpose of compiling aerodrome mapping information.</p> <p><i>Note.— Aerodrome mapping data is collected for purposes that include the improvement of the user's situational awareness, surface navigation operations, training, charting and planning.</i></p>	CARs.	Less protective or partially implemented or not implemented	Not specifically defined.	
Chapter 1 Reference	<p>Aerodrome mapping database (AMDB). A collection of aerodrome mapping data organized and arranged as a structured data set.</p>	CARs.	Less protective or partially implemented or not implemented	Not specifically defined.

Annex Reference	AERONAUTICAL INFORMATION SERVICES Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	<i>Aeronautical chart.</i> A representation of a portion of the Earth, its culture and relief, specifically designated to meet the requirements of air navigation.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined.	See AIPNZ GEN 3.2 for range and availability.
Chapter 1 Reference Definition	<i>Aeronautical data.</i> A representation of aeronautical facts, concepts or instructions in a formalized manner suitable for communication, interpretation or processing.	CAR Part 1.	No Difference		
Chapter 1 Reference Definition	<i>Aeronautical fixed service (AFS).</i> A telecommunication service between specified fixed points provided primarily for the safety of air navigation and for the regular, efficient and economical operation of air services.	CAR Part 1.	No Difference		Note: Subclause of Part 1 definition of aeronautical telecommunication service, which is aligned with Annex 10 Vol II definition.
Chapter 1 Reference Definition	<i>Aeronautical information.</i> Information resulting from the assembly, analysis and formatting of aeronautical data.	CAR Part 1.	No Difference		
Chapter 1 Reference Definition	<i>Aeronautical Information Circular (AIC).</i> A notice containing information that does not qualify for the origination of a NOTAM or for inclusion in the AIP, but which relates to flight safety, air navigation, technical, administrative or legislative matters.	CAR Part 1.	No Difference		

Report on entire Annex

Annex Reference	AERONAUTICAL INFORMATION SERVICES Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	Aeronautical information management (AIM). The dynamic, integrated management of aeronautical information through the provision and exchange of quality-assured digital aeronautical data in collaboration with all parties.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined.	
Chapter 1 Reference Definition	Aeronautical information product. Aeronautical data and aeronautical information provided either as digital data sets or as a standardized presentation in paper or electronic media. Aeronautical information products include: — Aeronautical Information Publication (AIP), including Amendments and Supplements; — Aeronautical Information Circulars (AIC); — aeronautical charts; — NOTAM; and — digital data sets. <i>Note.—Aeronautical information products are intended primarily to satisfy international requirements for the exchange of aeronautical information.</i>	CAR Part 175.	Less protective or partially implemented or not implemented	Not specifically defined.	See AIPNZ GEN 3.1 and 3.2 for range and availability.
Chapter 1 Reference Definition	Aeronautical Information Publication (AIP). A publication issued by or with the authority of a State and containing aeronautical information of a lasting character essential to air navigation.	CAR Part 1.	No Difference		

Report on entire Annex

Annex Reference	AERONAUTICAL INFORMATION SERVICES Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	<i>Aeronautical information service (AIS)</i> . A service established within the defined area of coverage responsible for the provision of aeronautical data and aeronautical information necessary for the safety, regularity and efficiency of air navigation.	CAR Part 1.	No Difference		
Chapter 1 Reference Definition	<i>AIP Amendment</i> . Permanent changes to the information contained in the AIP.	CAR Part 1.	No Difference		
Chapter 1 Reference Definition	<i>AIP Supplement</i> . Temporary changes to the information contained in the AIP which are provided by means of special pages.	CAR Part 1.	No Difference		
Chapter 1 Reference Definition	<i>AIRAC</i> . An acronym (aeronautical information regulation and control) signifying a system aimed at advance notification, based on common effective dates, of circumstances that necessitate significant changes in operating practices.	CAR Part 1.	No Difference		
Chapter 1 Reference Definition	<i>Air defence identification zone (ADIZ)</i> . Special designated airspace of defined dimensions within which aircraft are required to comply with special identification and/or reporting procedures additional to those related to the provision of air traffic services.		Not Applicable		Not used in New Zealand.

Report on entire Annex

Annex Reference	AERONAUTICAL INFORMATION SERVICES Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	Air traffic management (ATM). The dynamic, integrated management of air traffic and airspace (including air traffic services, airspace management and air traffic flow management) — safely, economically and efficiently — through the provision of facilities and seamless services in collaboration with all parties and involving airborne and ground-based functions.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined.	
Chapter 1 Reference Definition	Application. Manipulation and processing of data in support of user requirements (ISO 19104*). ----- * All ISO Standards referred to in this chapter are listed at the end of the chapter.	(British Standard) BS ISO 19104:2016.	No Difference		Note: in this case where an equivalent Australian/New Zealand Standard has not been issued, Standards New Zealand publishes the British Standard.
Chapter 1 Reference Definition	Area navigation (RNAV). A method of navigation which permits aircraft operation on any desired flight path within the coverage of ground- or space-based navigation aids or within the limits of the capability of self-contained aids, or a combination of these. <i>Note.— Area navigation includes performance-based navigation as well as other operations that do not meet the definition of performance-based navigation.</i>	CAR Part 1.	No Difference		
Chapter 1 Reference Definition	ASHTAM. A special series NOTAM notifying by means of a specific format change in activity of a volcano, a volcanic eruption and/or volcanic ash cloud that is of significance to aircraft operations.		Not Applicable		Not used in New Zealand.

Report on entire Annex

Annex Reference	AERONAUTICAL INFORMATION SERVICES Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	<p>Assemble. A process of merging data from multiple sources into a database and establishing a baseline for subsequent processing.</p> <p><i>Note.— The assemble phase includes checking the data and ensuring that detected errors and omissions are rectified.</i></p>	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	
Chapter 1 Reference Definition	<p>ATS surveillance service. Term used to indicate a service provided directly by means of an ATS surveillance system.</p>	AIPNZ GEN 2.2.	No Difference		
Chapter 1 Reference Definition	<p>ATS surveillance system. A generic term meaning variously, ADS-B, PSR, SSR or any comparable ground-based system that enables the identification of aircraft.</p> <p><i>Note.— A comparable ground-based system is one that has been demonstrated, by comparative assessment or other methodology, to have a level of safety and performance equal to or better than monopulse SSR.</i></p>	AIPNZ GEN 2.2.	No Difference		
Chapter 1 Reference Definition	<p>Automatic dependent surveillance — broadcast (ADS-B). A means by which aircraft, aerodrome vehicles and other objects can automatically transmit and/or receive data such as identification, position and additional data, as appropriate, in a broadcast mode via a data link.</p>	AIPNZ GEN 2.2.	No Difference		

Report on entire Annex

Annex Reference	AERONAUTICAL INFORMATION SERVICES Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	<p>Automatic dependent surveillance — contract (ADS-C). A means by which the terms of an ADS-C agreement will be exchanged between the ground system and the aircraft, via a data link, specifying under what conditions ADS-C reports would be initiated, and what data would be contained in the reports.</p> <p><i>Note.— The abbreviated term “ADS contract” is commonly used to refer to ADS event contract, ADS demand contract, ADS periodic contract or an emergency mode.</i></p>	AIPNZ GEN 2.2..	No Difference		
Chapter 1 Reference Definition	<p>Automatic terminal information service (ATIS). The automatic provision of current, routine information to arriving and departing aircraft throughout 24 hours or a specified portion thereof:</p> <p><i>Data link-automatic terminal information service (D-ATIS).</i> The provision of ATIS via data link.</p> <p><i>Voice-automatic terminal information service (Voice-ATIS).</i> The provision of ATIS by means of continuous and repetitive voice broadcasts.</p>	AIPNZ GEN 2.2, 2.2.1.	No Difference		
Chapter 1 Reference Definition	<p>Bare Earth. Surface of the Earth including bodies of water and permanent ice and snow, and excluding vegetation and man-made objects.</p>	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	

Report on entire Annex

Annex Reference	AERONAUTICAL INFORMATION SERVICES Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	Calendar. Discrete temporal reference system that provides the basis for defining temporal position to a resolution of one day (ISO 19108*).	(Australian Standard/New Zealand Standard) AS/NZS ISO 19108:2003.	No Difference		
Chapter 1 Reference Definition	Canopy. Bare Earth supplemented by vegetation height.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	
Chapter 1 Reference Definition	Confidence level. The probability that the true value of a parameter is within a certain interval around the estimate of its value. <i>Note.— The interval is usually referred to as the accuracy of the estimate.</i>	CARs.	Less protective or partially implemented or not implemented	Not specifically defined.	
Chapter 1 Reference Definition	Controller-pilot data link communications (CPDLC). A means of communication between controller and pilot, using data link for ATC communications.	AIPNZ GEN 2.2.	No Difference		
Chapter 1 Reference Definition	Culture. All man-made features constructed on the surface of the Earth, such as cities, railways and canals.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	

Report on entire Annex

Annex Reference	AERONAUTICAL INFORMATION SERVICES Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	<i>Cyclic redundancy check (CRC).</i> A mathematical algorithm applied to the digital expression of data that provides a level of assurance against loss or alteration of data.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	Beyond scope of rules.
Chapter 1 Reference Definition	<i>Danger area.</i> An airspace of defined dimensions within which activities dangerous to the flight of aircraft may exist at specified times.	CAR 71.161.	No Difference		
Chapter 1 Reference Definition	<i>Data accuracy.</i> A degree of conformance between the estimated or measured value and the true value.	CARs.	Less protective or partially implemented or not implemented	Not defined in CARs.	
Chapter 1 Reference Definition	<i>Data completeness.</i> The degree of confidence that all of the data needed to support the intended use is provided.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	
Chapter 1 Reference Definition	<i>Data format.</i> A structure of data elements, records and files arranged to meet standards, specifications or data quality requirements.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	

Report on entire Annex

Annex Reference	AERONAUTICAL INFORMATION SERVICES Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	Data integrity (assurance level). A degree of assurance that an aeronautical data and its value has not been lost or altered since the origination or authorized amendment.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	
Chapter 1 Reference Definition	Data product. Data set or data set series that conforms to a data product specification (ISO 19131*).	AS/NZS ISO 19131:2008.	No Difference		
Chapter 1 Reference Definition	Data product specification. Detailed description of a data set or data set series together with additional information that will enable it to be created, supplied to and used by another party (ISO 19131*).	AS/NZS ISO 19131:2008.	No Difference		
Chapter 1 Reference Definition	Data quality. A degree or level of confidence that the data provided meet the requirements of the data user in terms of accuracy, resolution, integrity (or equivalent assurance level), traceability, timeliness, completeness and format.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	

Report on entire Annex

Annex Reference	AERONAUTICAL INFORMATION SERVICES Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	Data resolution. A number of units or digits to which a measured or calculated value is expressed and used.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	
Chapter 1 Reference Definition	Data set. Identifiable collection of data (ISO 19101*).	AS/NZS ISO 19101.1:2015.	No Difference		
Chapter 1 Reference Definition	Data set series. Collection of data sets sharing the same product specification (ISO 19115*).	AS/NZS ISO 19115.1:2015.	No Difference		
Chapter 1 Reference Definition	Data timeliness. The degree of confidence that the data is applicable to the period of its intended use.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	
Chapter 1 Reference Definition	Data traceability. The degree that a system or a data product can provide a record of the changes made to that product and thereby enable an audit trail to be followed from the end-user to the originator.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.

Annex Reference	AERONAUTICAL INFORMATION SERVICES Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	Datum. Any quantity or set of quantities that may serve as a reference or basis for the calculation of other quantities (ISO 19104*).	BS ISO 19104:2016.	No Difference		
Chapter 1 Reference Definition	Digital Elevation Model (DEM). The representation of terrain surface by continuous elevation values at all intersections of a defined grid, referenced to common datum. <i>Note.— Digital Terrain Model (DTM) is sometimes referred to as DEM.</i>	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	
Chapter 1 Reference Definition	Direct transit arrangements. Special arrangements approved by the public authorities concerned by which traffic which is pausing briefly in its passage through the Contracting State may remain under their direct control.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	
Chapter 1 Reference Definition	Ellipsoid height (geodetic height). The height related to the reference ellipsoid, measured along the ellipsoidal outer normal through the point in question.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.

Annex Reference	AERONAUTICAL INFORMATION SERVICES Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	Feature. Abstraction of real world phenomena (ISO 19101*).	AS/NZS ISO 19101.1:2015.	No Difference		
Chapter 1 Reference Definition	Feature attribute. Characteristic of a feature (ISO 19101*).	AS/NZS ISO 19101.1:2015.	No Difference		
Chapter 1 Reference Definition	Feature operation. Operation that every instance of a feature type may perform (ISO 19110*).	AS/NZS ISO 19110:2006.	No Difference		
Chapter 1 Reference Definition	Feature relationship. Relationship that links instances of one feature type with instances of the same or a different feature type (ISO 19101*).	AS/NZS ISO 19101.1:2015.	No Difference		
Chapter 1 Reference Definition	Feature type. Class of real world phenomena with common properties (ISO 19110*).	AS/NZS ISO 19110:2006.	No Difference

Annex Reference	AERONAUTICAL INFORMATION SERVICES Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	Geodesic distance. The shortest distance between any two points on a mathematically defined ellipsoidal surface.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	
Chapter 1 Reference Definition	Geodetic datum. A minimum set of parameters required to define location and orientation of the local reference system with respect to the global reference system/frame.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	Common usage term.
Chapter 1 Reference Definition	Geoid. The equipotential surface in the gravity field of the Earth which coincides with the undisturbed mean sea level (MSL) extended continuously through the continents. <i>Note.— The geoid is irregular in shape because of local gravitational disturbances (wind tides, salinity, current, etc.) and the direction of gravity is perpendicular to the geoid at every point.</i>	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	
Chapter 1 Reference Definition	Geoid undulation. The distance of the geoid above (positive) or below (negative) the mathematical reference ellipsoid. <i>Note.— In respect to the World Geodetic System — 1984 (WGS-84) defined ellipsoid, the difference between the WGS-84 ellipsoidal height and orthometric height represents WGS-84 geoid undulation.</i>	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	

Report on entire Annex

Annex Reference	AERONAUTICAL INFORMATION SERVICES Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	Gregorian calendar. Calendar in general use; first introduced in 1582 to define a year that more closely approximates the tropical year than the Julian calendar (ISO 19108*). <i>Note.— In the Gregorian calendar, common years have 365 days and leap years 366 days divided into twelve sequential months.</i>	AS/NZS ISO 19108:2003.	No Difference		
Chapter 1 Reference Definition	Height. The vertical distance of a level, point or an object considered as a point, measured from a specific datum.	CAR Part 1.	No Difference		
Chapter 1 Reference Definition	Heliport. An aerodrome or a defined area on a structure intended to be used wholly or in part for the arrival, departure and surface movement of helicopters.	CAR Part 1.	No Difference		
Chapter 1 Reference Definition	Human factors principles. Principles which apply to aeronautical design, certification, training, operations and maintenance and which seek safe interface between the human and other system components by proper consideration to human performance.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	Common usage term.

Report on entire Annex

Annex Reference	AERONAUTICAL INFORMATION SERVICES Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	<p>Integrity classification (aeronautical data). Classification based upon the potential risk resulting from the use of corrupted data. Aeronautical data is classified as:</p> <p>a) <i>routine data</i>: there is a very low probability when using corrupted routine data that the continued safe flight and landing of an aircraft would be severely at risk with the potential for catastrophe;</p> <p>b) <i>essential data</i>: there is a low probability when using corrupted essential data that the continued safe flight and landing of an aircraft would be severely at risk with the potential for catastrophe; and</p> <p>c) <i>critical data</i>: there is a high probability when using corrupted critical data that the continued safe flight and landing of an aircraft would be severely at risk with the potential for catastrophe.</p>	CARs.	Less protective or partially implemented or not implemented	Not specifically defined.	
Chapter 1 Reference Definition	<p>International airport. Any airport designated by the Contracting State in whose territory it is situated as an airport of entry and departure for international air traffic, where the formalities incident to customs, immigration, public health, animal and plant quarantine and similar procedures are carried out.</p>	CAR Part 1.	No Difference		
Chapter 1 Reference Definition	<p>International NOTAM office (NOF). An office designated by a State for the exchange of NOTAM internationally.</p>	CAR Part 1.	No Difference		

Report on entire Annex

Annex Reference	AERONAUTICAL INFORMATION SERVICES Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	Logon address. A specified code used for data link logon to an ATS unit.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	
Chapter 1 Reference Definition	Manoeuvring area. That part of an aerodrome to be used for the take-off, landing and taxiing of aircraft, excluding aprons.	CAR Part 1.	No Difference		
Chapter 1 Reference Definition	Metadata. Data about data (ISO 19115*). <i>Note.— A structured description of the content, quality, condition or other characteristics of data.</i>	AS/NZS ISO 19115.1:2015.	No Difference		
Chapter 1 Reference Definition	Minimum en-route altitude (MEA). The altitude for an en-route segment that provides adequate reception of relevant navigation facilities and ATS communications, complies with the airspace structure and provides the required obstacle clearance.	AIPNZ GEN 2.2.	No Difference		
Chapter 1 Reference Definition	Minimum obstacle clearance altitude (MOCA). The minimum altitude for a defined segment of flight that provides the required obstacle clearance.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.

<p>Chapter 1 Reference</p> <p>Definition</p>	<p>Navigation specification. A set of aircraft and flight crew requirements needed to support performance-based navigation operations within a defined airspace. There are two kinds of navigation specifications:</p> <p><i>Required navigation performance (RNP) specification.</i> A navigation specification based on area navigation that includes the requirement for performance monitoring and alerting, designated by the prefix RNP, e.g. RNP 4, RNP APCH.</p> <p><i>Area navigation (RNAV) specification.</i> A navigation specification based on area navigation that does not include the requirement for performance monitoring and alerting, designated by the prefix RNAV, e.g. RNAV 5, RNAV 1.</p> <p><i>Note 1.— The Performance-based Navigation (PBN) Manual (Doc 9613), Volume II, contains detailed guidance on navigation specifications.</i></p> <p><i>Note 2.— The term RNP, previously defined as “a statement of the navigation performance necessary for operation within a defined airspace”, has been removed from this Annex as the concept of RNP has been overtaken by the concept of PBN. The term RNP in this Annex is now solely used in the context of navigation specifications that require performance monitoring and alerting, e.g. RNP 4 refers to the aircraft and operating requirements, including a 4 NM lateral performance with on-board performance monitoring and alerting that are detailed in Doc 9613.</i></p>	<p>AIPNZ GEN 2.2.</p>	<p>No Difference</p>

Chapter 1 Reference Definition	<i>Next intended user.</i> The entity that receives the aeronautical data or information from the aeronautical information service.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	
Chapter 1 Reference Definition	<i>NOTAM.</i> A notice distributed by means of telecommunication containing information concerning the establishment, condition or change in any aeronautical facility, service, procedure or hazard, the timely knowledge of which is essential to personnel concerned with flight operations.	CAR Part 1.	No Difference		
Chapter 1 Reference Definition	<i>Obstacle.</i> All fixed (whether temporary or permanent) and mobile objects, or parts thereof, that: a) are located on an area intended for the surface movement of aircraft; or b) extend above a defined surface intended to protect aircraft in flight; or c) stand outside those defined surfaces and that have been assessed as being a hazard to air navigation.	For a) and b), AC139-6, 1.3; for c) CAR Part 77, Appendix B, B.1.	No Difference		
Chapter 1 Reference Definition	<i>Obstacle/terrain data collection surface.</i> A defined surface intended for the purpose of collecting obstacle/terrain data.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.

Annex Reference	AERONAUTICAL INFORMATION SERVICES Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	Origination (aeronautical data or aeronautical information). The creation of the value associated with new data or information or the modification of the value of existing data or information.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	
Chapter 1 Reference Definition	Originator (aeronautical data or aeronautical information). An entity that is accountable for data or information origination and/or from which the AIS organization receives aeronautical data and aeronautical information.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	
Chapter 1 Reference Definition	Orthometric height. Height of a point related to the geoid, generally presented as an MSL elevation.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	
Chapter 1 Reference Definition	Performance-based communication (PBC). Communication based on performance specifications applied to the provision of air traffic services. <i>Note.— A required communication performance (RCP) specification includes communication performance requirements that are allocated to system components in terms of the communication to be provided and associated transaction time, continuity, availability, integrity, safety and functionality needed for the proposed operation in the context of a particular airspace concept.</i>	CARs.	Less protective or partially implemented or not implemented	Not specifically defined.

Annex Reference	AERONAUTICAL INFORMATION SERVICES Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	Position (geographical). Set of coordinates (latitude and longitude) referenced to the mathematical reference ellipsoid which define the position of a point on the surface of the Earth.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	Common usage term.
Chapter 1 Reference Definition	Post spacing. Angular or linear distance between two adjacent elevation points.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	
Chapter 1 Reference Definition	Precision. The smallest difference that can be reliably distinguished by a measurement process. <i>Note.— In reference to geodetic surveys, precision is a degree of refinement in performance of an operation or a degree of perfection in the instruments and methods used when taking measurements.</i>	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	Common usage term.
Chapter 1 Reference Definition	Pre-flight information bulletin (PIB). A presentation of current NOTAM information of operational significance, prepared prior to flight.	AIPNZ GEN 3.1, 3.4.1.	No Difference		

Report on entire Annex

Annex Reference	AERONAUTICAL INFORMATION SERVICES Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 1 Reference Definition	Prohibited area. An airspace of defined dimensions, above the land areas or territorial waters of a State, within which the flight of aircraft is prohibited.		Not Applicable		Term not used in New Zealand.
Chapter 1 Reference Definition	Quality. Degree to which a set of inherent characteristics fulfils requirements (ISO 9000*). <i>Note 1.— The term “quality” can be used with adjectives such as poor, good or excellent.</i> <i>Note 2.— “Inherent”, as opposed to “assigned”, means existing in something, especially as a permanent characteristic.</i>	AS/NZS ISO 9000:2016.	No Difference		
Chapter 1 Reference Definition	Quality assurance. Part of quality management focused on providing confidence that quality requirements will be fulfilled (ISO 9000*).	AS/NZS ISO 9000:2016.	No Difference		
Chapter 1 Reference Definition	Quality control. Part of quality management focused on fulfilling quality requirements (ISO 9000*).	AS/NZS ISO 9000:2016.	No Difference

Chapter 1 Reference Definition	SNOWTAM. A special series NOTAM given in a standard format providing a surface condition report notifying the presence or cessation of hazardous conditions due to snow, ice, slush, frost, standing water or water associated with snow, slush, ice or frost on the movement area.	CAR	No Difference	NIL	NIL
Chapter 1 Reference Definition	Station declination. An alignment variation between the zero degree radial of a VOR and true north, determined at the time the VOR station is calibrated.		Not Applicable		"Station declination" does not appear in any SARPs.
Chapter 1 Reference Definition	Terrain. The surface of the Earth containing naturally occurring features such as mountains, hills, ridges, valleys, bodies of water, permanent ice and snow, and excluding obstacles.	CARs.	Less protective or partially implemented or not implemented	Not specifically defined in CARs.	Common usage term.
Chapter 1 Reference Definition	Traceability. Ability to trace the history, application or location of that which is under consideration (ISO 9000*). <i>Note.— When considering product, traceability can relate to:</i> — the origin of materials and parts; — the processing history; and — the distribution and location of the product after delivery.	AS/NZS ISO 9000:2016.	No Difference

Chapter 3 Reference 3.5.1 Standard	<p style="text-align: center;">3.5 Use of automation</p> <p>3.5.1 Automation shall be applied in order to ensure the quality, efficiency and cost-effectiveness of aeronautical information services.</p> <p><i>Note.— Guidance material on the development of databases and the establishment of data exchange services is contained in Doc 8126.</i></p>	CAR Part 175.	Less protective or partially implemented or not implemented	Not specified.	
Chapter 3 Reference 3.5.2 Standard	<p>3.5.2 Due consideration to the integrity of data and information shall be given when automated processes are implemented and mitigating steps taken where risks are identified.</p> <p><i>Note.— Risks of altering the integrity of data and information may be introduced by automated processes in cases of unexpected systems behaviours.</i></p>	CAR Part 175.	Less protective or partially implemented or not implemented	Not specified.	
Chapter 3 Reference 3.5.3 Standard	<p>3.5.3 In order to meet the data quality requirements, automation shall:</p> <ul style="list-style-type: none"> a) enable digital aeronautical data exchange between the parties involved in the data processing chain; and b) use aeronautical information exchange models and data exchange models designed to be globally interoperable. 	CAR Part 175.	Less protective or partially implemented or not implemented	Not specified.	

Report on entire Annex

Annex Reference	AERONAUTICAL INFORMATION SERVICES Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 3 Reference 3.6.1 Standard	<p align="center">3.6 Quality management system</p> <p>3.6.1 Quality management systems shall be implemented and maintained encompassing all functions of an AIS, as outlined in 2.2. The execution of such quality management systems shall be made demonstrable for each function stage.</p> <p><i>Note.— Guidance material is contained in the Manual on the Quality Management System for Aeronautical Information Services (Doc 9839).</i></p>	CAR 175.67.	No Difference		The rule mandates a safety management system, which supersedes the requirement for a quality management system. Aeropath manages quality assurance in accordance with its Corporate Policy and Process Manual using ISO 9000 principles.
Chapter 3 Reference 3.6.2 Recommendation	<p>3.6.2 Recommendation.— <i>Quality management should be applicable to the whole aeronautical data chain from data origination to distribution to the next intended user, taking into consideration the intended use of data.</i></p>	CAR 175.67.	No Difference		See 3.6.1.
Chapter 3 Reference 3.6.3 Recommendation	<p>3.6.3 Recommendation.— <i>The quality management system established in accordance with 3.6.1 should follow the ISO 9000 series of quality assurance standards and be certified by an accredited certification body.</i></p>	CAR 175.67.	No Difference		See 3.6.1.

Report on entire Annex

Annex Reference	AERONAUTICAL INFORMATION SERVICES Standard or Recommended Practice	State Legislation, Regulation or Document Reference	Level of implementation of SARP's	Text of the difference to be notified to ICAO	Comments including the reason for the difference
Chapter 6 Reference 6.3.2.1 Standard	6.3.2 NOTAM 6.3.2.1 When an AIP Amendment or an AIP Supplement is published in accordance with AIRAC procedures, a Trigger NOTAM shall be originated. <i>Note.— Detailed specifications concerning the Trigger NOTAM are contained in the Procedures for Air Navigation Services — Aeronautical Information Management (PANS-AIM, Doc 10066).</i>	CAR 175.61(c)(6).	No Difference		The NOTAM remains in force for 14 days.
Chapter 6 Reference 6.3.2.2 Standard	6.3.2.2 A NOTAM shall be originated and issued promptly whenever the information to be distributed is of a temporary nature and of short duration, or when operationally significant permanent changes or temporary changes of long duration are made at short notice, except for extensive text and/or graphics.	CAR 175.105(5).	No Difference

<p>Chapter 6 Reference 6.3.2.3 Standard</p>	<p>6.3.2.3 A NOTAM shall be originated and issued concerning the following information:</p> <ul style="list-style-type: none"> a) establishment, closure or significant changes in operation of aerodrome(s) or heliport(s) or runways; b) establishment, withdrawal or significant changes in operation of aeronautical services (aerodromes, AIS, ATS, communications, navigation and surveillance (CNS), meteorology (MET), search and rescue (SAR), etc.); c) establishment, withdrawal or significant changes in operational capability of radio navigation and air-ground communication services. This includes: interruption or return to operation, change of frequencies, change in notified hours of service, change of identification, change of orientation (directional aids), change of location, power increase or decrease amounting to 50 per cent or more, change in broadcast schedules or contents, or irregularity or unreliability of operation of any radio navigation and air-ground communication services or limitations of relay stations including operational impact, affected service, frequency and area; d) unavailability of back-up and secondary systems, having a direct operational impact; e) establishment, withdrawal or significant changes to visual aids; f) interruption of or return to operation of major components of aerodrome lighting systems; g) establishment, withdrawal or significant changes to procedures for air navigation services; 	<p>CAR 175.105(5); AC175-1 Appendix 3.</p>	<p>No Difference</p>
