

# Airworthiness Directive Schedule

## Aeroplanes

### Embraer EMB-820 Series

25 February 2021

---

#### Notes:

1. Embraer EMB-820 series aircraft were assembled in Brazil by Embraer from complete airframe kits supplied by Piper Aircraft Corporation, and are approved under Brazilian Type Certificate (TC) No. CTA EA-7505.
2. The Brazilian type certificate contains the same technical data as FAA TC No. A20SO applicable to Piper PA-31 series aircraft manufactured in the USA.
3. The Piper kits were supplied to Embraer with a Piper serial number, but the aircraft were type certificated with an Embraer serial number. The original Piper serial number is considered the equivalent serial number for the Embraer aircraft.
4. The equivalent Piper model and serial number for Embraer assembled and type certificated aircraft is published in Embraer Boletim de Informação (Service Bulletin) number 800-000-0003.
5. The Piper serial numbers of the kits supplied to Embraer are listed under FAA Type Certificate A20SO as not eligible for certification under the FAA TC.
6. Because they are technically identical for practical purposes New Zealand registered Embraer EMB-820 Series aircraft are considered to be Piper PA-31 Series aircraft for the purposes of AD compliance.

**Requirement:** For New Zealand registered Embraer EMB-820 series aircraft compliance is required with every AD listed in the Piper PA-31 series AD Schedule which are applicable to the equivalent Piper serial number for the individual Embraer EMB-820 series aircraft.

<b>ANAC EMB-820C S/N:</b>	<b>Equivalent Piper PA-31-350 S/N:</b>
